

“The crime of the future.”

Illegal debit/credit card skimmers have been found placed inside gas pumps in various parts of the country.

When a number of illegal skimmers were discovered at gas stations in central Florida, a local sheriff called gas pump skimmer scams, “the crime of the future.”

During routine inspections, Geauga County Weights and Measures officials will inspect local gas station for these illegal skimming devices.

Gas station owners, managers, attendants, as well as consumers are advised to take steps to protect themselves against these scams.

Don't be a victim of gas pump Skimmer Scams!

Card Skimming Devices

Debit/Credit card skimmer are small, electronic devices that can be illegally installed inside a gas pump to steal card information from unsuspecting consumers.

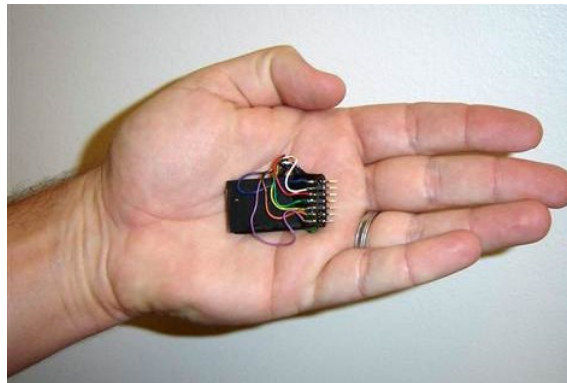

The devices are wired to the card reader and keypad and can record account numbers and PIN's when a customer swipes their debit or credit card at the pump. An experienced thief can install one of these devices in less than a minute.

Data obtained by devices can be used to create bogus cards to access a consumer's bank account. Victims of these scams have been known to have thousands of dollars withdrawn from their accounts without their knowledge.

Preventing These Scams

Weights and Measures staff are trained to look for anything suspicious when performing routine gas inspections. But, a periodic inspection by county officials only goes so far in preventing card skimming scams.

What more can be done?

- Gas Station managers and attendants should closely monitor all activity at their stations.
- Gas Pumps should be opened up and the internal mechanisms examined regularly by a station employee.
- The most effective way to stop these scams is to install more secure locks on every pump. Better locks will prohibit unauthorized access to a gas pump's interior components.

What can consumers do?

- **NEVER** use a debit card when paying for gas at the pump. Thieves can steal PIN numbers.
- Report any unusual activity or anything that looks out of place.
- Monitor monthly bank and credit card statements for fraudulent charges.
- Use cash to pay for purchases whenever possible.
- If you believe you have been a victim of skimmer scam, notify local law enforcement as well as you bank and credit card issuer immediately.
